ADITYA UNIVERSITY

DATABASE MANAGEMENT SYSTEMS -2501IT05

(Common to CSE, IT, AIML & CSE (DS))

IE-1 Important Questions

UNIT-1

1. Explain the Three-Schema Architecture and discuss its role in achieving data independence.
2. Describe the architecture of DBMS with a neat diagram and explain the functions of each component.
3. Explain different types of database users and discuss the responsibilities of the Database Administrator (DBA).
4. Compare the Relational, ER, Object-Oriented, and Semi-Structured data models.
5. Explain the steps involved in database design with a suitable example.
6. Discuss Parallel Databases and Distributed Databases.
7. Explain Client-Server Architecture with neat diagrams.

UNIT-2

1. Explain the Relational Model and its components with examples.
2. Explain different types of keys in the Relational Model with suitable examples.
3. Explain DDL commands with syntax and examples.
4. Explain DML commands with syntax and examples.
5. Explain SQL functions with suitable examples.
6. Discuss aggregate functions with GROUP BY and HAVING clauses with examples.
7. Discuss the importance of NULL values with examples.
